## ***INTRODUCTION:***

# **Zoghori Foundation is the vehicle for Zoghori Sacco Society Ltd for Corporate Social Responsibility.**

## **Education:**

The current flagship project of the Foundation is an education scholarship scheme for bright but less fortunate children who are facing difficulties in paying school fees for both secondary and university education.

Zoghori Sacco Foundation was established in 2019 as a registered trust in recognition of the need to enhance the existing Corporate Social Responsibility (CSR) initiatives by the society.

At that point, the society felt it was its duty to not only grow financially but also develop a deeper commitment to help enhance the growth of the community. We believe that our role goes beyond profit-making to include promoting the long-term economic prosperity and quality of life for everyone in our communities. If our people prosper, we prosper as a society and soar to unimaginable heights of achieving our motto of **BUILDING ONE ANOTHER.**

In the year 2016, Zoghori Sacco Society Limited successfully rolled out an Education program to pay school fees for needy secondary school students as an integral part of its CSR projects. The program will continue in the days ahead, to enable these children to achieve their full potential.

## Education and Training:

Inequality in education opportunities continues to present a major barrier in the realization of people’s potential within the country. Good education is critical to improve income, employment and enterprise opportunities.

For girls, education makes a difference to employment opportunities, marriage age, health and their capacity to make better decisions about their lives and those of their children. Poverty prevents literally many people from enjoying the advantage of formal schooling at every level in the educational system.

Despite the fact that education is compulsory and free through primary school and subsidized in secondary school, the children, especially those from disadvantaged backgrounds continue to miss out on secondary/ University school education due to financial problems and many opt out of the education system altogether, which often occurs during the transition from primary school to secondary school.

Kenya has made some progress over the past few decades in making higher education more accessible, however disparities still persist in students gaining

access to colleges and universities. These disparities limit the workforce opportunities, democratic participation and life chances of the disadvantaged and needy students. Zoghor Foundation is contributing toward this end by supporting the government to increase access to education for the young needy students both at secondary school and university level.

## **GOAL**

**Provide access to education for children/young people, particularly those from disadvantaged backgrounds.**

## **FOCUS AREAS:**

2. Providing sponsorship to bright but needy students in secondary school.
3. Providing scholarships to bright students in the university.
4. Providing guidance/counseling and mentorship for secondary school and university.
5. Provide life changing ideas and destroy ignorance amongst our youth.

## **INITIATIVES**
